### PROFESSIONAL SUMMARY

Software developer with hands-on experience building web projects before and during university. I focus on responsive interfaces, API-driven systems, admin panels, content management, analytics, and deployment workflows. My background in business informatics helps me think beyond code: I design systems around real users, operations, data, and maintainability.

### EDUCATION

#### University of Information Technology and Communications

**College of Business Informatics - Department of Management Information Systems**

Academic focus on business processes, information systems, data, technology management, and the relationship between software and organizational workflows.

### PROGRAMMING EXPERIENCE

#### Web Development and Digital Systems

**Pre-university experience and ongoing freelance/project work**

- Developed responsive websites, portfolio systems, landing pages, and business-focused interfaces.
- Built admin dashboards for managing services, projects, messages, blog content, and product catalogs.
- Worked with APIs, authentication, PostgreSQL data persistence, image handling, and deployment flows.
- Improved user-facing websites with bilingual content, contact forms, SEO structure, and performance-minded layouts.

## ADMINISTRATIVE AND LEADERSHIP EXPERIENCE

### Team Coordination and Project Administration

**Planning, communication, task management, and delivery follow-up**

- Comfortable leading small teams, assigning tasks, and keeping work organized from idea to delivery.
- Strong in client communication, requirements collection, prioritization, and translating needs into practical software features.
- Able to document workflows, manage project updates, and keep technical work aligned with business goals.
- Interested in management information systems, business operations, and using software to improve decision-making.

## SELECTED PROJECT TYPES

### Portfolio and Personal Brand Platform

A bilingual portfolio system with project archive, contact handling, CV download, analytics, blog beta, digital products catalog, and admin dashboard.

React TypeScript Express PostgreSQL

---

### Business Websites and Client Systems

Service websites and operational dashboards for restaurants, accounting, task management, security support, architecture, and customer-facing workflows.

Responsive UI Admin Panels Forms SEO

---

### Digital Product Kits

Reusable web product structures for landing pages, dashboard starters, portfolio kits, and small-business digital tools.

Product Thinking Templates Customization

## CORE SERVICES

### Frontend Development

Clean, responsive interfaces using React, TypeScript, Tailwind CSS, and component-based structure.

### Backend and Databases

Express APIs, authentication flows, PostgreSQL schemas, admin routes, and persistent production data.

### Admin Dashboards

Tools for managing content, services, projects, messages, products, and visitor information.

### Business Delivery

Planning, documentation, deployment, maintenance guidance, and client-ready handover.

## TECHNOLOGY STACK

HTML | CSS | JavaScript | TypeScript | React | Vite | Node.js | Express | PostgreSQL | Drizzle | Tailwind CSS | PHP | MySQL | GitHub

## MANAGEMENT SKILLS

Task Planning | Client Communication | Workflow Analysis | Problem Solving | Documentation | Delivery Follow-up

## LANGUAGES

Arabic - Native | English - Technical Working Proficiency

## AVAILABILITY

Available for freelance web projects, dashboard systems, portfolio builds, and full-time opportunities.
